# The Fear of Wolves

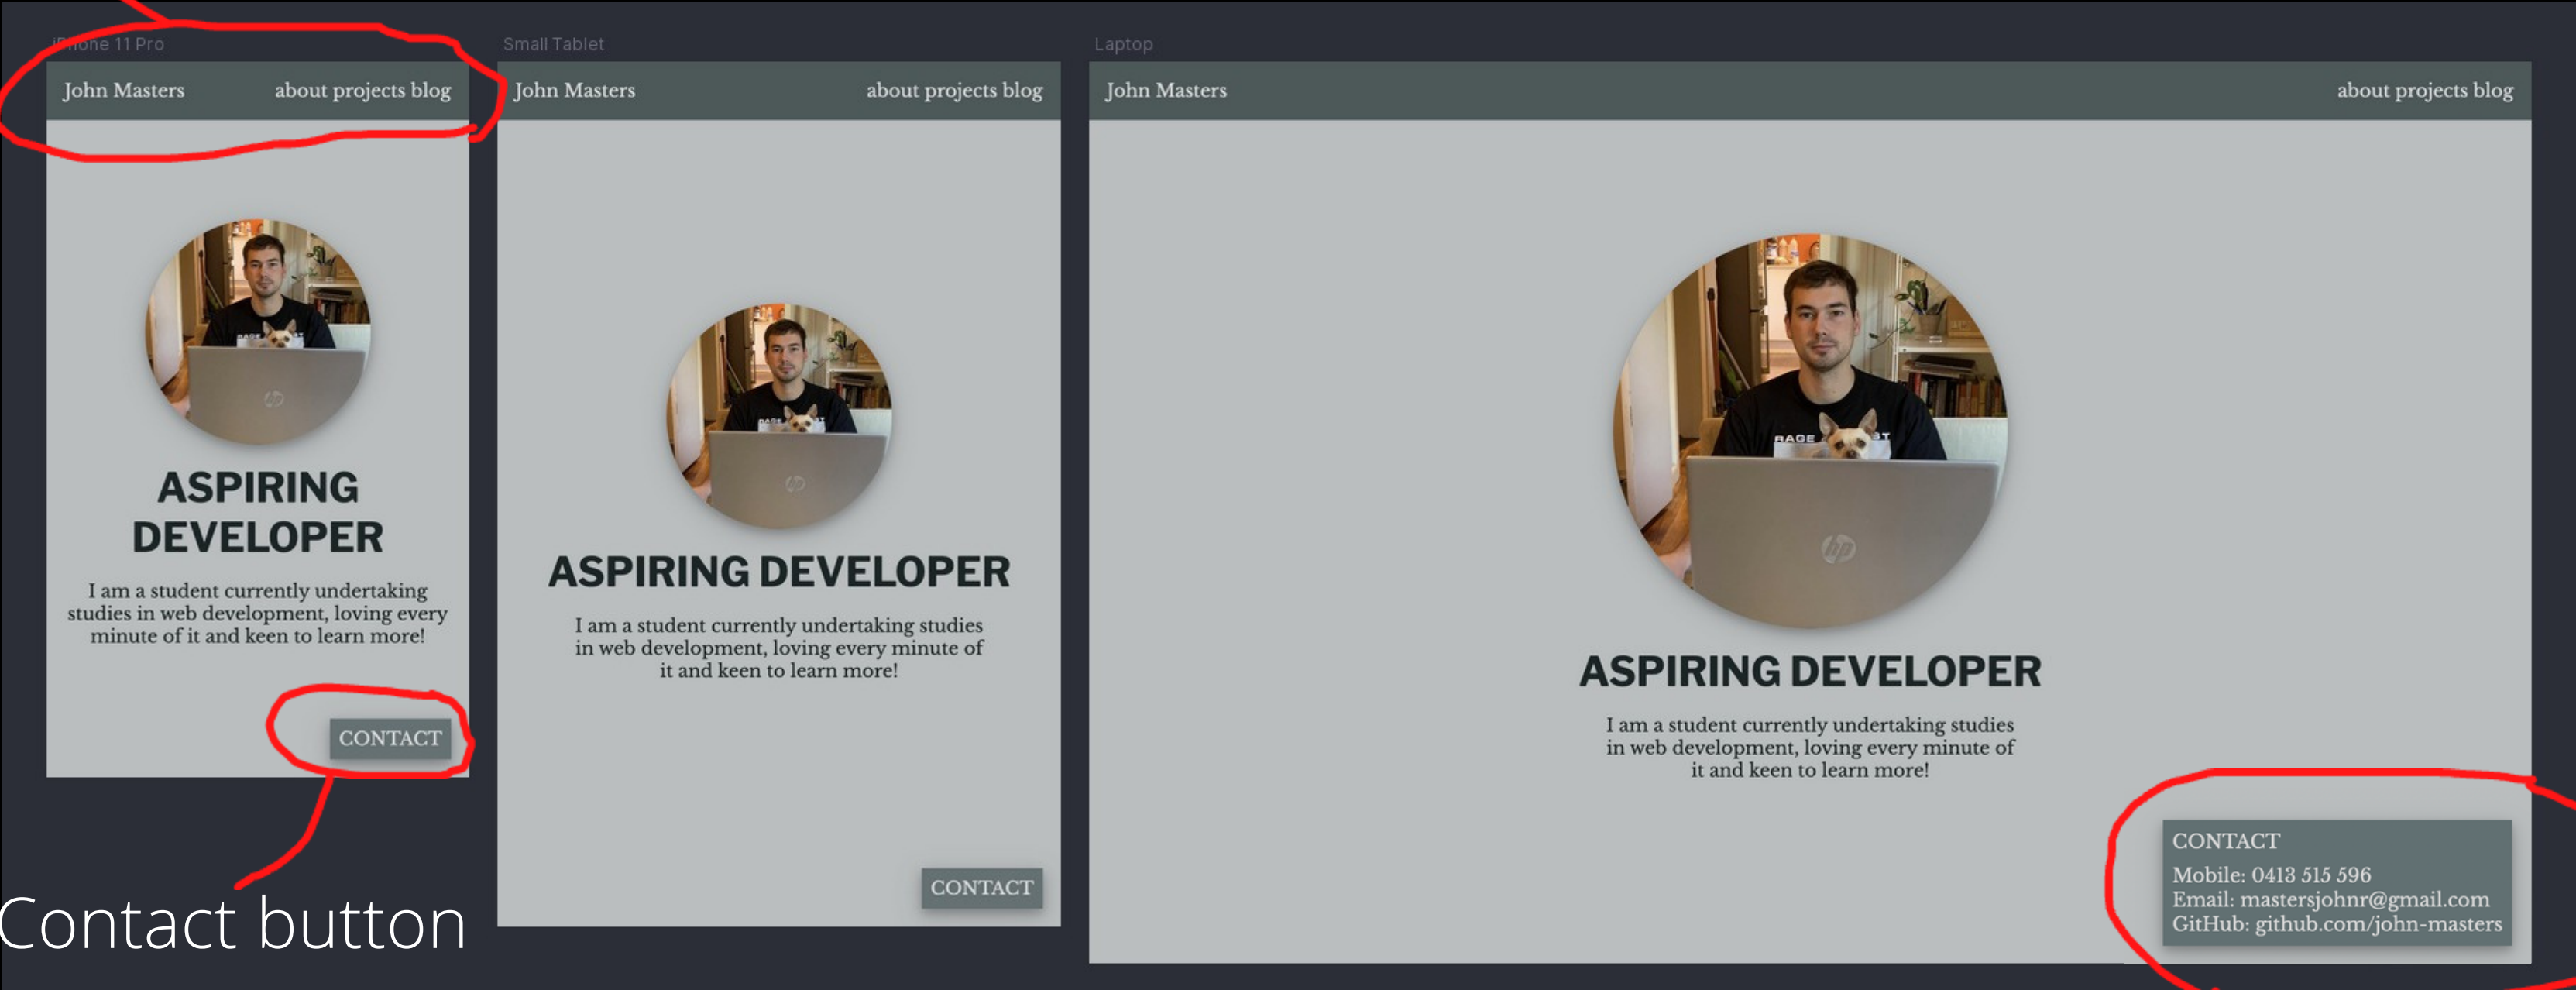

Although the fear of wolves is pervasive in many human societies, the majority of recorded attacks on people have been attributed to animals suffering from rabies. Non-rabid wolves have attacked and killed people, mainly children, but this is unusual, as wolves are relatively few, live away from people, and have been taught to fear humans by hunters and shepherds.

about projects blog

**HELLO, I AM JOHN MASTERS.**

I'm a student at *Coder Academy* undertaking a full stack web development bootcamp. I love food, my chihuahua, Nuggy and technology.

### Why programming?

Prior to starting this bootcamp, I worked customer service jobs and was always tinkering with an application called Autohotkey. I created a few programs that would automatically generate emails, or send text messages, which made my jobs a lot easier.

As there was only a limited amount of things I could do with Autohotkey, I decided to get serious about programming and enrolled at Coder Academy to learn more.

## Bob Ross Blog

Be so very light. Be a gentle whisper. A little happy sunlight shining through there. It's a very cold picture, I may have to go get my coat. It's about to freeze me to death. Don't kill all your dark areas - you need them to show the light. Anything you want to do you can do here.

This painting comes right out of your heart. This is unplanned it really just happens. Once you learn the technique, ohhh! Turn you loose on the world; you become a tiger.

Fluff that up. We have a fantastic little

Fluff that up. We have a fantastic little sky! This is your world, whatever makes you happy you can put in it. Go crazy. Do an almighty painting with us. I thought today we would do a happy little picture. Let your imagination be your guide.

In painting, you have unlimited power. You have the ability to move mountains. Nothing's gonna make your husband or wife madder than coming home and having a snow-covered dinner. Let's do that again. Everybody needs a friend.
